

SPECIAL CONSTRUCTION ADVISORY – STREET LIGHTS

STREET LIGHT INSTALLATION TO BEGIN TUESDAY, NOVEMBER 19TH

- ❖ Construction crews are scheduled to begin the installation of the decorative street lights along Broadway Avenue on Tuesday, November 19th. The street lights are one of the final components remaining in the Project. The street light installation is scheduled to start at Main Street and proceed to the north. It is estimated that the work in each block of Broadway Avenue will take two days, during which time the block under construction will be closed to traffic and parking. The street will be re-opened in the evenings and access to businesses will be maintained at all times. The Broadway Avenue intersections at Main Street, William Street, Clark Street and Water Street will all remain open while the lights are being installed.

The tentative schedule for the street light installation is as follows:

- Main Street to William Street: Tuesday and Wednesday, November 19th and 20th
- William Street to Clark Street: Thursday and Friday, November 21st and 22nd
- Clark Street to Water Street: Monday and Tuesday, November 25th and 26th
- Water Street to Fountain Street: Wednesday November 27th

Since construction schedules can vary depending on weather and other factors, the schedules and sequence of construction is subject to change. Property owners on Broadway Avenue will be notified in advance of the work starting on their block.
